Water Supply Scheme

WD 0418—GPB—22 500—2/8 36

3028

Serial No 5

Letter no A 3 345/35—H07 28-12-35 from DC, Kadma forwarding an estimate for Rs 90,000 for the improvement of Chuchungpole water supply

1 The estimate sent up is an abstract estimate and not a detailed one

2 The Incl EC have resolved that the first item of the first stage viz duplicating the supply main costing about Rs 43,000 and the third item viz erection of chlorinator at a cost of Rs 2000 might be taken up in the first instance

3 As regards the financing the scheme, the Incl EC request Govt to contribute a moiety of the cost of the scheme and to advance the other half viz Rs 22,500 as a loan at a reasonable rate of interest and also to waive the cost Estt, tools and plant charges, in view of the poor finances of the Mpty

Madras File No 74 of 1935 — General and Revenue Secretariat

3) Revised estimate

34) The Dept. now reports that the mtee are agreeable to borrow half the estimated cost of the I st and II nd stages of the scheme, as proposed to be taken up, Rs 22,5000, that the mtee request Govt to sanction the loan at a lower rate of interest and to allow them (the mtee) to repay the loan in 20 annual equated payments instead of 10 annual equated payments at 5½% interest, proposed by Govt, in view of the commitments of the mpl. The mtee propose to earmark the item of revenue to be derived from enhancements of water tax for repayment of the loan with interest

35) The mtee also urge Govt to reconsider their order declining to waive the cost of Estt, Works and plant charge and to waive these charges to minimise expenditure

The estimated income from water tax in the mpl for the current year is Rs 18000

36) Submit for orders with reference to para 4 of the notes

Subject

Improvement of water supply ... Guntakal

4601

4601

General and Revenue Secretariat | File No | of 193 | [App F III—2

Serial No

37 The Muni Council want the loan of Rs 22,500 to be given for a period of 20 years at a lower rate of interest According to the orders recently passed the rate of interest to be charged for such works is 4½ % If the loan is sanctioned at 4½% for 20 years the annual equated payment to be made by the Municipality will be about Rs 1650

38 The Muni propose to discharge the loan by earmarking for the purpose the extra revenue to be derived by the enhancement of the water rate on house connections from Rs 6 to Rs 12 per annum The addl revenue expected to be realised is Rs 1500-

39 As regards the Govt share of the cost of the work the Director of Health has recommended the grant of half the cost, the amount viz Rs 22500, being paid in five annual instalments of Rs 4500 each

40 The Muni want the Govt Town Planning charges to be waived The Dy Comr was told in this Office letter no 26946 dt 18-2-36 that this was not possible, but he has urged a reconsideration of that order At 12½% the Govt T P charges on the amount of the estimate viz Rs 45000, comes to Rs 5625- If the waiving is not sanctioned, the amount of the loan to be given & the Govt grant will increase correspondingly

Loan 22500 + 2812 - Rs 25312
Govt grant 22500 + 2812 = Rs 25312

NOTE—Contn Sheet

Chickmagalur water supply

File No 74 of 1935-36 General and Revenue Secretariat

43 The proposals are -

(1) Sanction to improvements to the water supply in Chickmagalur town at a cost of Rs 45 000 for the present

(2) Waiving the recovery of Establishment and Tools and Plant charges

(3) Sanction of half the cost as Government grant to be given in five annual instalments

(4) Sanction of a loan for the other half to be borne by the Municipality at 4½% repayable in 30 years

44 After much consideration the percentage of Establishment and Tools and Plant charges in respect of water supply and drainage schemes was reduced by Government from 18% to 12½% It is not desirable to waive the recovery of these charges

45 The amount of the estimate including Establishment and Tools and Plant charges at 12½% comes to Rs 50 625 and the amount of Government grant (half the cost) comes to Rs 25 312-8-0 It is necessary to know whether Government can make available the Government grant out of the normal allotment after meeting the past commitments

46 Information as to the total amount to be provided in respect of grants already sanctioned and the amount still available for new grants may be furnished If as suggested by the Director of Health the Government grant is made available in five annual instalments it

The Kannalam water supply

Serial No

it is not clear how the Municipality will be able to finance the unpaid portion of the Government grant It is desirable to complete the sanctioned works as early as possible instead of taking up a large number of works with inadequate funds and ~~thus~~ prolong them for an undul long period When the Municipality is not in a positio to finance its own share it cannot be expected to meet the unpaid quota of Government and it is therefore not desirable to sanction this work till Government are able to make available the entire grant for this work after meeting the grants already sanctioned

(7) ~~xxxxxxxxxxxxx~~ The Municipality has no funds of its own to meet any portion of its share of the capital outlay It is most undesirable from a financia point of view to take up a work when the Municipality is unable to pay even a portion of the cost and Government grants should be given in preference to Local Bodies which have ~~not~~ got ready their shares or at least a substantial portion of their shares As it is only an improvement work that is now suggested there can be no harm in its being delayed until the Municipality accumulates some funds for the ~~xxxxxx~~ purpose

(8) As regards the terms of the loan asked for it is to be stated that the period of repayment suggested viz. 20 years is too long and that the maximum period should be limited to 15 years For discharging a loan of Rs 25,312½ at 4½% within 15 years the amount payable

Jul File No 74 of 1935 32 General and Revenue Secretariat

every year towards both principal and interest will come to s 2 356 Information is not furnished as to the extra maintenance charges if any which the Municipality will have to bear, after these improvements are effected From the Budget estimates of the Municipality for 1935-36, it is seen that the normal expenditure is much more than the normal income and such excess is noticeable during previous years also After the electrification of the town is completed the Municipality will have to pay Rs 6 188 towards street lighting charges and Rs 4 500 towards power for water supply against about Rs 3 500 and Rs 1 500 now being incurred It is not known what action has been taken for the levy of lighting cess and what amount is expected to be realised Taking into account the present financial position of the Municipality its capacity to repay the loan is doubtful and it may not also be possible for Government to make available the entire Government share (half the cost)

49 For reasons stated above the proposed scheme is not financially acceptable

Scheme of water supply to Chickmagalur Town.

File No 74 of 1935-36 General and Rev Secretariat

Serial No

77) Representations have been made that the water supply to Chickmagalur town is very unsatisfactory and it is very necessary to complete the first stage at least. This work consists mainly of laying a duplicate 6" main from the reservoir to Filter beds. The completion of this scheme will not involve any extra maintenance expenditure but is calculated to save Rs 2250 which is the running cost of a pump and engine which will become unnecessary after duplication.

78) The first stage scheme may be carried out by using second class pipes from Bhadravati Town although the total cost including Establishment charges will amount to 45000, Govt can give a grant of Rs 40000 in the current year and earmark 5000 Rs in the next year's grant. The balance of Rs 35000 may be given as a loan with interest at 4½% repayable in 15 annual instalments. The amount of each instalment will roughly be Rs 3300. This can be met from the savings effected in water rate and by whatever increase in water rate

79) The scheme may also contain at least the taking over the water supply mains in the Municipal limits

Scheme of water supply — Chitravanapalem
Tuni taluk

File No 74 35-29 of 1935-36 General and Revenue Secretariat

Serial No

The Hyderabad Govt Council do not like to draw the balance of loan of Rs 8229-11-8 as ~~a loan of~~ Rs 10 lakhs has been raised recently and all the first dues are going to be repaid. The Hasan Sahib will draw the balance of Rs 32766-13-4 as they understand that the Ramanathapuram Anicut work will be completed by the close of next year. The Chairmanpalem Govt Council will have to draw the whole amount of 34460/- but the Govt Council (Local Govt Authority) may not be able to draw all the 3 lakhs as there are hardly four months more and all the works Council dues be completed within that time. Perhaps Rs 35000/- may, in the above case, be granted as a loan to the Chairmanpalem Tuni Taluk

## Office of the Dewan of Mysore

## NOTE

Dated 7th September 1936.

Notes of the interview which the members of kmegalur Municipal Council had with the Dewange this morning (7th September 1936)

ater supply

Ramanna the Vice-President and leader of leputation explained that though the Council o now spent about 2½ lakhs of rupees over the er-supply system yet the benefit derived was ensurate with the amount spent and that great ity was experienced by the inhabitants in regard to obtaining an adequate supply of water, especially in the summer season and in the higher parts of the town

A fresh scheme had therefore been prepared at the instance of the Council by the Sanitary Engineer costing Rs.1 lakh It was proposed to carry out the project in two stages the first of which would involve an expenditure of Rs.50,000/- They therefore prayed that as the Municipal Council had no funds to spare for this work half the amount might be given as a grant from State Funds and the other half as a loan at 4 or 4½% interest

The reply dated 28th June 1936 received by the Council from the Government to their proposal was also shown to the Dewan-in-charge . It stated in effect that as neither the Government nor the Municipal Council

Ref 95-35-65 relating to vegetable market is put up for kind perusal
Ref Municipal relating to water supply scheme (D 166) has been replied to the Director of Municipalities on 9-7-36 in connection with the levy of maintenance charges. The Dewan may be reminded in the matter

5/11/36

were able to meet the cost straightaway and as the work could not be spread over a period of 3 years it must lie over for the present

The Dewan-in-charge promised to discuss the matter with the Second Member of Council after his return to Bangalore

(2) Drainage

Mr Ramanna explained that a scheme costing Rs. 1½ lakhs had been prepared and that Government help was required to carry it through

The Dewan-in-charge said that the project might be carried out in easy stages year by year as funds permitted after due provision had been made for the water supply scheme It might be possible to give a sum of Rs. 5000/- per annum from the allotment made for Town Improvements and if the Municipal Council could find an equal amount the project could be completed in a few years The Deputy Commissioner was asked to send up proposals on these lines for the consideration of Government

(3) Vegetable Market

Mr Ramanna said that when the subject of constructing a vegetable market for the town was mooted about two years ago Government had advised them to spread the work over a number of years But now that a plan and estimate for Rs. 26 000/- had been prepared and submitted for sanction they were told that piecemeal work was not satisfactory and they might take up the project after the water supply scheme had been disposed of This was a great disappointment as they had already acquired the land at a cost of Rs. 6½ lakhs, which was lying waste and

Dewan-in-charge's instructions

Development Secretary to speak to him about this at Bangalore

was an eyesore to the town They therefore prayed for permission to carry out the scheme piecemeal ie in three stages spending Rs.7,500/- per year

The Dewan-in-charge promised to look into the matter

(4) Girls' High School

The early establishment of a Girls' High School at Chikmagalur was pressed The Dewan-in-charge said that while he was of opinion that such a school was a desideratum for this district there were financial difficulties in the way The cost of the scheme had been worked out in detail by the Education Department and it was found impossible at present to find the Government share of the recurring cost which would come to about Rs.5,000/- per annum The Dewan-in-charge enquired whether the Mission proposal would not be cheaper The Deputy Commissioner said that it might be cheaper, but it was not popular Moreover, it contemplated the opening of only the IVth Form in the first year, the Vth in the second and so on

The Dewan-in-charge finally said that while he was in complete sympathy with the prayer, they must wait for more propitious times

Subject Improvements to Chikmagalur Water Supply

In forwarding herewith copies of Letters Nos H C 170 dated 8th June 35 and 102 dated 12th December 35 received from the President, Municipa Council, Chikmagalur on the above subject, I have the honour to state that a water supply scheme estimated to cost Rs 90000/- was prepared by the Sanitary Engineer and sent to the President for finding out ways and means to finance the scheme The Sanitary Engineer's letter No 2834 dated 10-5-35 and its enclosures are herewith enclosed for kind reference

2 The matter was referred to a Sub Committee appointed by the Municipal Council and they have expressed the opinion that the first item of the first stage viz , duplicating the supply main costing about Rs 43000/- and the 3rd item viz , supply and erection of one Candy's Chlorinator at a cost of Rs 2000/- might be taken up and the other item of works might be put off till the finances of the Municipality improve

3 This report of the Sub Committee was placed before the Municipal Council who at their meeting held on 30-5-35 accepted it in toto

4 In this meeting as well as in the meeting held on 26-11-35 the Council have resolved to approach Government to contribute a moity of the cost of the scheme, to advance the other half viz , Rs 22500/- as a loan at a reasonable rate of interest and also to waive the cost of

of Tools and plants in view of the fact that the finances of the Municipality are poor and that the Council have already spent large sums for water works They have also resolved to repay the loan by enhancing the existing water rate from Rs 6 to 12 per tap

5 The question of improving the Water supply of the town is an urgent one and I have asked the President to take the preliminary steps and submit definite proposals for enhancing water tax

6 The need for an adequate water supply for the town is very great and the proposed expenditure is urgently needed There is also the possibility of the Municipality saving a considerable sum of money if the work is taken up at an early date as the Mysore Iron Works are stated to be clearing their old stock of pipes at a concession rate of Rs 4/- per Cwt

7 Government Sanction for the proposed work may therefore be obtained as well as for the loan applied for I shall be submitting definite proposals in respect of the enhancement of Water Tax The Municipal President has been asked to formulate the proposals in a proper form for submission to Government

I have the honour to be,

Sir,

Your most obedient servant,

Deputy Commissioner,

KADUR DISTRICT

No A 3 345/35 36

Dated Camp Mudigere 22nd March 1936

Dear Sir

With reference to your D O letter No L 7231/M1 74-35-8 dated the 20th instant I write to state that the water supply to the Town is drawn from a perenniel halla in the Bababudan Hills The water is more than ample not only for the present but also for future needs of the town The whole difficulty is in respect of the distribution system The delivery mains from the halla commence with a 6-inch pipe and succeed with a 5 and 4-inch cast iron pipe respectively The present main is absolutely of insufficient capacity to draw the full supply of water due to the choking up and other cau es ~~The present main is not in a position to draw the full supply of water~~ The pre ent system has been -- declared by the Health Department, Bureau of Sanitary Engineering to be thoroughly unsuited and unsatisfactory for the needs of the growing town and they have prooosed a scheme for Rs 90 COO/- to be taken uo in two stages The first stage is to duplicate the pipe line from the Head -- Works to the Filter Beds and the second stage is to put in pressure filters and the construction of an elevated tank

The first stage is estimated to cost Rs 50 700/- and the second stage Rs 39 800/- The former is considered to be more important and of urgent necessity to the town The ~~present~~ conditions ate present are extremely bad and the improvement suggested require urgent and serious consideration I may mention here that it takes 24 hours for us to draw 125 000/- gallons of water from the Head Works to the Filter Beds and this supply is drawn in 10 hours It is thus seen that in order to keep the fully supply of water in the Filter Beds the present main has to be duplicated when it will be possible to keep the supply of water in the town throughout the day

The present arrangement is to supply water to the town intermittently that is 4-30 a m to 10 A M and from 4-30 p m to 8 P M but in actual practice the busiest portion of the town namely the bazaar -- street and residential quarters situated in the higher level of the town get only two hours of the supply of slow flow in the morning and 2 hours

in the evening and it is only the lower portion of the town that receives this intermittent supply for the full time To overcome this difficulty of water supply, people are found to take water from the open irrigation channel which flows through a portion of the town in its northern side This water coming through the wet fields carries with it manure and other ~~impissmmix~~ impurities which make it absolutely ~~unfit~~ dangerous for domestic use and drinking purposes and people are suffering considerably in health as a result thereof It is therefore, of very great importance in the -- interest of the health of the town that this use of impure water should be stopped and facilities provided for the supply of good water by immediately undertaking the improvements suggested

The all important question of the finances of the Municipality has next to be considered The Municipality proposed that Government be approached to kindly contribute half the cost of the first stage viz Rs 22 500/- and to sanction a loan of the remaining half at a reasonable rate of interest In your letter No L 6246/ Fin IV 74-35-6 dated the 18th February 1936 you have intimated the kind approval of Government for the sanction of a loan to the Municipality of half the amount required for the ~~second~~ First and third stages of the work and have asked me to obtain a resolution of the Municipal council in respect of the terms of repayment mentioned therein I have transmitted the same to the President Municipal Council and am awaiting his reply thereto A reminder will be issued to him to expedite the matter The proposal of the Municipality is to increase the tax on private service taps from Rs 6/- to Rs 12/- and thereby increase the revenue by about Rs 1800/- The improvement of the Water supply will tend to increase the demand for private connections and it is expected that this increase will give at least another Rs 1000/- This entire amount thus realised is proposed to be ear-marked for the repayment of the loan which the Government would kindly sanction The help of -- Government in the matter of the grant of the remaining half of the estimated amount of the first and third stages viz Rs 22500/- out of the provision made under Town Improvement is of extreme urgency and importance and -- without this help I am afraid, the Municipality will not be in a position to carry out the work

I beg to state finally that the pipes required for the proposed improvement can now be obtained at a concession rate of Rs 4/- per Cwt from the Mysore Iron Works as they are stated to be clearing the old stock of pipes This would enable the Municipality to save a considerable -- amount of money required for the purchase of pipes for the proposed improvement and it is therefore necessary to take up the work on hand -- immediately when this concession is available

The favour of obtaining early orders of Government in the matter is requested

Yours sincerely

Chairman Municipality

To

Dear Sir 2-4-36

With refce to the correspondence ending with your DO letter no $A_3$ 3657/36 dt 22-3-36 regarding the improvement of the Water Supply to Chitkulpalem town, I am directed to state that no satisfactory arrangements for the supply of water in the town will be possible under the existing water supply is transferred by the PWD to the Bureau of Govt Engineering, and request you to advise the PWD to hand over the control to the Bureau.

and forward their views in the matter to Govt early

As regards the information wanted in your DO letter no $A_3$ 7200 dt 7/1/36, I am to say that the Bureau of Govt Engineering is levying a charge not exceeding 5% towards the Supervision charges and that this should not be considered too much by the PWD having regard to the assured supply of water expected from the proposed arrangement

The question under examination has no urgency.

Regarding the loan asked for by the PWD for the water supply improvement, I am to state that the information already called for in this Office letter no 26246 dt 18-2-36 is awaited

Yours obediently

Secretary to Govt

Secretary Kothapalli

GENERAL AND REVENUE SECRETARIAT,

*Bangalore dated* 2nd April 1936

D O No L 75-26 Rl 34-35

Dear Sir,

With reference to the correspondence ending with your D O. letter No A3-345/35-36 dated 22nd March 1936 regarding the improvement of water supply to Chikmagalur town, I am desired to state that no satisfactory arrangements for the supply of water in the town will be possible unless the control of water supply is transferred by the Municipality to the Bureau of Sanitary Engineering, and to request you to advise the Municipal Council to hand over the control to the Bureau and forward their resolution in the matter to Government early

As regards the information wanted in your D O letter No A3 - 2200 dated 7th January 1936, I am to say that the question is under examination but in any case the Bureau of Sanitary Engineering is not likely to charge more than 5% of the maintenance cost towards supervision charges and that this should not be considered too much by the Municipal Council having regard to the ~~assessed~~ assured supply of water expected from the proposed arrangement

Regarding the loan asked for by the Municipal Council for the works of improvement, I am to state that the information already called for in this office letter No.L 6246 dated 18th February 1936 is awaited

Yours sincerely,

WATER SUPPLY TO CHICKMAGALUR TOWN

With reference to your letter No L 7231/M1 7--35-8 dated the 19/20th March 1936, and your memo No L 7232/M1 dated 20th March 1936, requesting me to take needful steps to improve matters and send a report to Government, I have the honour to submit for information of Government , a copy of Notes of Inspection of - Chickmagalur Town on 20th January 1936 A copy of the Inspection Notes has been sent to the Deputy Commissioner, Kadur District, the President, Chickmagalur Municipality, the District Medical and Sanitary Officer, Kadur District, Chickmagalur, for taking necessary action The President of the Municipality is requested to-day to intimate the action taken

I have the honour to be,
Sir,
Your most obedient servant,

Director of Health

RLVS

Notes of Inspection of Chickmagalur Town by the Director of Health in Mysore on 20th January 1936

***

The District Medical and Sanitary Officer showed the three ponds which are to be filled up The pond opposite to Anjaneya Temple which is drained at present is wanted by the people of the locality to be kept as a pond for washing clothes One of the tanks is not very far from the pond and it is within a distance of about 100-150 yards It is better the pond is not filled up The locality will be free from Malaria if it is not filled up with channel water and maintained as a park If the pond is at any time wanted for Teppotsava which comes off once in 2 or 3 years, water may be taken into the pond for the occasion and then drained again to keep it dry Second pond - Arrangements have been made for filling up the pond and converting it into a draw well for drinking purposes by the Municipality for the people in the colony The third pond is in the Muslim quarters by the side of Jumma mosque The muslims of the locality want the pond to be maintained in a better condition The pond is in a dilapidated condition and the water in the pond is overgrown with algae and foul smelling There is a tap in the mosque which is used by the people that go to the mosque for prayers when water is available in the tap I was told that about 100 people attend the mosque for prayers Either a cement cistern or a galvanised tank, which can take in about 200 to 300 gallons of water, will serve the purpose of providing water for ablution and for prayer As the pond is in the midst of the town unprotected, as the water is not good it is better to close it in the interest of the public health of the locality and facility provided in the mosque itself

Inspected the slaughter house In the beef slaughter house the animals to be slaughtered are herded within five

five feet from the slaughtering place The animals are slaughtered within the site of animals that are herded within the compound A separate cattle shed may be arranged to be put up to avoid the animals to be slaughtered seeing the slaughtering and also skinning of animals The bones of the slaughter house are allowed to be scattered about, round the slaughter house All the bones may be collected and covered with earth so that the bones may become free from decomposing material and when there is a demand they may be sold

Inspected the Adikarnataka colony and the cattle pound which are situated behind the Maternity Hospital Both the Adikarnataka Colony and the cattle pound are too close to the Maternity Hospital It is better that they are removed from the place

The President of the Municipality and some of the members say that there is a great demand for houses, for poor people and people who cannot put up big buildings, and that nearly 500 houses may be needed There are nearly 20 to 25 acres of municipal land available which can be formed into sites suitable to put up buildings to satisfy the needs The Sanitary Engineer is requested to prepare necessary plans for the formation of sites to accommodate as many houses for satisfying the needs of the people that require small houses I am also informed that money that will be obtained by selling sites will go towards forming roads, putting up drains and also water supply

The revenue channels that go through the town are a source of danger to public health both from malarial as well as general public healt point of view especially the western extension As a result, no houses have come up in this extension As the extension gets flooded, it is necessary that all the revenue channels are diverted to go outside

outside the town avoiding parts of the town that are likely to be built on

Water supply of the town - Though there is plenty of water in the reservoir, it is not possible to take to the town sufficient quantity to give continuous water supply on account of the small size of the main The people are getting water in different areas for 2 hours The water has been rationed The town is divided into three sectors and each section gets water supply for 2 hours Improvement of water supply is an urgent necessity

Conservancy - There are nearly 3500 houses in the town The Chief Officer informs that there are only about 500 houses that may have daily conservable latrines The number of scavengers for the whole town is two and there are no public latrines The Chief Officer informs that there are no bye-laws to enforce the people to have daily conservable latrines in their houses Necessary bye-laws may be brought in to force and special conservancy cess may be levied which would go to help the people a good way as it is stated that each house is at present paying at the rate of 8 annas to Re 1/- for engaging private scavengers to clean the latrines in the houses If the municipality engage an establishment of scavengers at the rate of one scavenger for 60 to 70 houses, the work can be very easily carried out Arrangements can also be made for the manufacture of compost with the collected nightsoil and rubbish from the town and it is likely that there will be market for the compost as there are Coffee Plantations all round

The District Sanitary Officer wanted a plan of a latrine as Borehole latrine for use in this town The Committee may in order to be selected for a plan to be prepared and sent to the District Medical Officer What has been suggested to the District Medical and Sanitary Officer is about a pour latri

latrine with a concrete slab provided with a Hindustan closet The Sanitary Engineer is requested to send the necessary plans If this is found useful in his compound it may be possible to have similar ones in other officers' quarters and other bungalows

SIR

Subject - Improvements to Chickmagalur Town Water Supply

Adverting to your letter No L 6246/M1 74-35-6 dated 18th Februa 1936, stating the terms subject to which Government would consider the question of sanctioning the loan to the Municipality in connection with the above project and inquiring if the Council are agreeable to borrow amount required on these terms, etc , I have the honor to forward herev a copy of the President's letter No 149/1 dated 30th March 36, together with a copy of the resolution passed on the subject by the Municipal Council in their meeting held on 2-th March 1936

2 The Council while agreeing to borrow half the estimated cost of the first and 3rd stages of the scheme, Viz Rs 22,500/- have requested Government to sanction the loan at a lower rate of interest and to allow them to repay in 20 annual equated instalments instead of 10 annual equated payments at 5½ % interest proposed by Government in view of pa of funds and of commitments by the Council already to the extent of Rs 17,000/- a year towards the electrification of the town

3 They have agreed to earmark as suggested by Government the item revenue to be derived from enhancement of water tax for repayment of th loan with interest

4 It is, however urged by them that Government may be pleased to reconsider their order declining to waive the cost of establishment, and plants and to waive these charges altogether to minimuse expenditur

with a view to represent the case to Government, the Council propose to send a deputation consisting of the President, Mr Ramachandra Vasudeva Rao, the Municipal Councillor and Mr M.L Nagappa Setty on behalf of the public of Chickmagalur to wait upon the Dewan Saheb, as per resolution of the Council This does not seem to be necessary as it will entail needless expenditure of the Municipal fund

6 I request that in these circumstances, Government may be moved to consider the request of the Municipal Council favourably

7 The estimate for the work and the connected records are returned herewith as required

I have the honour to be,

S i r,

Your most obedient servant,

Deputy Commissioner,
Kadur Dist

Re Improvements to Chikmagalur Town Water Supply

Adverting to your letter No L 9625/I 1 74-35-10 dated 18-6-1936 directing that the scheme might be kept in abeyance till the finances of the Municipal Council improve, I have the honour to state that the Municipal Council at its meeting held on 28-8-1936 has resolved that, in order to mitigate the hardship and inconvenience experienced by the public owing to the present inadequate supply of water and to meet the increasing demand for house connections, the Government be requested to reconsider their order and grant a contribution of Rs 22,500/- and a li sum as a loan or a loan of Rs 45,000/- at not more than 4½% interest, repayable in twenty annual instalments, in case the Government contri tion cannot be obtained, so that the first stage of duplicating the - mains might be taken up, in the first instance

The President of the Municipality states in his letter No H C. 93/9-10-1936 that the scheme, if worked out, would enable the Municip to augment its revenue by way of house connections, besides alleviati the present water scarcity and that the situation was explained in pe to the Dewan-in-charge during his recent visit to this place in Septe 1936 It is further stated that action is being taken separately t increase the existing taxes on houses, shops etc., as explained in President's note a copy of which is appended to this

The President [redacted] might t

Ways and means to augment the resources of Chikmagalur town Municipality

---

1 Enhancing the existing flat rate on water from Rs6/- to 12

---

At present there are about 400 house connections and by enhancing the present rate from 6/- to 12/- an increase of Rs 2,400/- will be effected - 2,400/-

2 Owing to scarcity of water a number of applications for private connections have not been given As there is keen demand for private connections if adequate supply of water is ensured the public are expected to take approximately a hundred connections more than what is now by which the Municipality will be getting Rs 1,200/-

3 As the discharge of water from Head Works to Filter is inadequate a pump and an engine which has been installed at the Head Works for purping more water last year will have to be worked at least nine months in a year (except during monsoon period) The running cost of the engine and pump is approximately Rs 250/- a month or Rs 2,250/- for 9 months which the Municipality is forced to incur By augmenting the supply through duplicate mains through gravity, the engine and the pump may easily be dispensed with and the Municipality will thus save Rs 2,250/- being the running cost of the same

4 Now the reassement of Houses has been completed, the Municipality will realise Rs 4,000/- from houses and vacant sites

5 Very nearly Rs 300/- is expected to be realised by the introduction of Vehicle tax = Rs 300/-

Thus in all the Municipality will be able to set apart - Rs 8,950/- towards the adjustment of the loan

Under the circumstances explained, the Municipality can easily pay towards the loan and its interest

---

Sd/-G Abdul Rahiman,
For President, Chikmagalur Municipality

"Copy"

Deputy Commissioner, Kadur

Letter No H C 93/36-37 dated 9th October 1936 from the - President, Town Municipal Council, Chikmagalur, to the Deputy Commissioner, Kadur District, Chikmagalur

---

With reference to your Memo No A3 345/35-36 dated 28th June 1936 forwarding a copy of letter No L 9625/M 1 74-35-10 dated 18th June 1936 from the Secretary to Government, Development Department, re improvement of water supply to this town, I have the honour to state that the need for adequate supply of water is very keenly felt and to meet this demand the Council porposed to take up only the first stage of duplicating the main as an urgent necessity

This will not only mitigate the hardship that is now caused to the growing population but will also enable the Municipal Council to augment their resources by increasing the No of private connections In case the scheme is to lie over till sufficient funds become available for the pur ose, it will not only take 10-15 years for the - Council to find funds of its own for the work but also the dearth of water grows more and more accute

In view of all these difficulties and after fully considering all the aspects of the case, the Municip l Council have resolved to approach Government with your kind support, to kindly reconsider their order and grant Rs 22500/- by way of contribution and a similar sum as a loan If the Municipal Council are not supported by Government contribution, they have resolved to take up the whole amount of - Rs 45,000/- as a loan at not more than 4½% of interest, repayable in 20 annual instalments They have approved of the ways and means of repayment of the loan and a copy of the note approved by them together with an extract from the resolution dated 28-8-1936 is enclosed for favour of perusal

In this connection I may be permitted to state that when the situation was explained to the Dewan-in-charge on 7-9-1936 by the Municipal Councillers, he promised a reconsideration of the order under reference

In the above circumstances, I request you to kindly recom e with your support for sanctioning the above proposal of the Municipal

Municipal Council to enable them to take up the scheme on hand early

The second stage of the scheme for pressure filters etc , will be taken up later on as finances improve

Action is being taken separately to increase the rate on private connections and taxes on houses, shops etc

I understand that the Iron Works at Bhadravati are disposing ~~xx~~ of their stock of pipes at a reduced rate If the - Municipality does not avail of this opportunity and purchase the pipes, there is every probobality of the price of the pipes going higher I request you to write to the Iron Works authorities - through the Government in getting the pipes we are in need of at a concession rate

---

Deputy Commissioner,
Kadur District

D O .307 37/1936

Office of the Municipal Council

Dated, Chikmagalur 3-11- 1936

2254

Sir,

In the matter of improvement of water supply to this town, the Government have been approached separately for reconsideration of their order to keep the scheme in abeyance till the finances improve

In this connection, I wish to bring to your notice that we are able to get water only for two hours in the morning and two hours in the evening. Even this limited supply is hardly sufficient for the normal requirements of the growing population of this Town i.e. bathing and drinking purposes. The need for increase of supply is very acute, and though the present scheme has been approved by the Sanitary Engineer, we have not been able to afford the required relief in this respect to the suffering public (as yet) There is a great clamour in the town for adequate supply. I request you to kindly see that the scheme

scheme is sanctioned early

Yours sincerely,

S V Ramanna,

Venkatanara ayya Esquire, B A,

Letter No 2908 dated 4/5th February 1937 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the President, Town Municipal Council, Chickmagalur

---

Re Improvements to Chickmagalur Town Water Supply

---

With reference to your No 93/36-37 dated 17th December 1936, I have the honour to inform you that the General Manager of the Mysore Iron and Steel Works at Bhadravati, writes in his No 5854 dated 29th December 1936 that 1042 lengths of 7" and 6' C I pipes each can be delivered out of the stock and that the same will be agreed to be supplied at Rs 92/- per ton F O R Bhadravati

The cost of the pipes comes to Rs 34,835/- against the estimated provision of Rs 43,000/- for 24,360 R ft of 6" C I pipes including laying charges for the first stage work as detailed below

| | | | |
|---|---|---|---|
| 1 | 1042 length of 12 each or 12,504 C I pipes of 6" dr weighing 2 cwt 1 qr 4lbs | 171.17 | tons |
| 2 | 1042 length of 12' each or 12504 C I pipes of 7 dr weighing 3 cwt 3 qrs 26 lbs | 207.47 | |
| | Total | 378 64 | tons |

The cost of 373 64 tons at Rs 92/- a ton = Rs 34,835/-

The original estimate amounting to Rs 50,700/- is modified to Rs 57,722/- as per present rates of C I pipes and forwarded herewith with a comparative statement for favour of your countersignature and return with furas

My dear Sir,

I am in receipt of your D O letter No 5827 date the 11th instant

I am enclosing herewith a stock list of pipes as on 1st February 1937 This refers only to good pipes According to the book balance we have only a very small tonnage of irrigation pipes

So far as I understand what you actually want is pipes which are borne under scrap The half-yearly stock-taking is under progress and I expect the detailed worked out sheets in the course of 3 or 4 days when I shall be able to exactly give you the number and sizes of pipes in excess of book figures which are borne under scrap

With kindest regards,

Yours sincerely
